

## **In Brief**

### **Rijeka: Presentation of the Project of the High Commercial Court “Web Bankruptcy”**

**RIJEKA** - The specialized web page “Web Bankruptcy” which posts public notices concerning the sale of assets in bankruptcy proceedings, provides lists of bankruptcy trustees and other information in the field of bankruptcy law under the jurisdiction of commercial courts was presented in Rijeka yesterday. The use of “Web Bankruptcy” will assist in decreasing costs of bankruptcy procedures, facilitate social informatization, contribute to the judicial reform and the process of bringing Croatia closer to the European standards, stated at the presentation Mario Vukelić, judge of the High Commercial Court who is also the creator of the project concept.

As the most important menu on the page “Web Bankruptcy” Vukelić earmarked the one pertaining to the sale of assets in bankruptcy procedures because it offers integral texts of published notices, value estimates and photographs of assets that are being sold. The web page also offers basic information on the bankruptcy procedure, overview of bankruptcy regulations, examples from judicial practice, expert articles and court addresses. The list of bankruptcy trustees, besides the addresses, also contains their business references so, as it was said, this will enable judges to more easily select a trustee among the total of 485 bankruptcy trustees in Croatia.

## Ukratko

### Rijeka: predstavljen projekt Visokog trgovačkog suda 'web stečaj'

■ RIJEKA - Specijalizirana internetska stranica "web stečaj" na kojoj se objavljuju oglasi o prodaji imovine u stečajnim postupcima, liste stečajnih upravitelja i drugi podaci s područja stečajnog prava za koje su mjerodavni trgovački sudovi predstavljena je jučer u Rijeci. Korištenje "web stečaja" omogućit će smanjenje troškova u stečajnom postupku, pospješiti informatizaciju društva, pridonijeti reformi pravosuđa te procesu približavanja Hrvatske europskim standardima, istaknuo je na predstavljanju sudac Visokog trgovačkog suda Mario Vukelić koji je i idejni tvorac projekta.

Vukelić je najvažnijim izbornikom na stranici "web stečaj" označio onaj o prodajama imovine u stečajnom postupku, jer nudi cjelovite tekstove objavljenih oglasa, procjene i fotografije imovine koja se prodaje. Stranica nudi i osnovne podatke o stečajnom postupku, pregled stečajnih propisa, primjere iz sudske prakse, stručne radove, adrese sudova. Popis stečajnih upravitelja, osim adresa, sadrži i njihove poslovne reference, pa će, kako je rečeno, sucima biti olakšan izbor među ukupno 485 stečajnih upravitelja u Hrvatskoj. (H)
